

Naja Mikkelsen short CV

Naja Mikkelsen is senior research scientist at the Geological Survey of Denmark and Greenland, Copenhagen, Denmark. Her research is focused on global climate change, paleoclimate and paleoceanography with emphasis on the Arctic. She has a long sea-going experience and participated in marine geological expeditions in the Pacific, Indian and Atlantic Oceans; around Greenland and in the Arctic Ocean. She has conducted several seasons of field work in Greenland and participated in scientific ice camps in the Arctic Ocean.
